EDUCATION

Bachelor of Science, Computer Science

May 2027

Minor in Business Intelligence and Analytics, Certificate in Applied Design Experience and Research

University of Texas at Dallas - Richardson, Texas

Awards: Dean's List, Academic Excellence Scholarship

Related Coursework: Software Engineering, Data Structures, Advanced Algorithms and Analysis, Database Systems

WORK EXPERIENCE

Bluebeam, Product Management Intern

June 2026 - August 2026

Smart Pharma Solutions, Software Engineer Intern

June 2025 – August 2025

- Engineered a Python pipeline using OpenAI API and PyPDF to extract and synthesize **50+ page** regulatory PDFs, reducing report generation time from 2 hrs to 6 minutes (**95% time reduction**)
- Built a centralized tracking system in Coda consolidating **200+ product requirements** from fragmented sources, cutting document retrieval time by **80%**

Alura, Product Designer

May 2025 – June 2025

- Architected technical requirements from user research and UX flows in Figma, partnering directly with engineering to deliver a **40% conversion** improvement on AI-powered features
- Designed scalable component libraries to standardize design-to-development handoff across the engineering team

Association for Computing Machinery UTD, Frontend Developer

August 2023 – December 2023

- Spearheaded frontend for a sustainability-focused iOS/Android app, integrating React Native, JavaScript, and Google Maps API, delivering core functionality needed to demonstrate the potential to reduce campus waste by **up to 50%**
- Partnered with cross-functional team of **4 developers** in agile sprints to ship full-stack application in **10 weeks**, successfully presenting final product demo to industry judges and **200+ student audience**

PROJECTS

Market Pulse - Financial Dashboard | React, Next.js, REST APIs, PostgreSQL, Vercel, GitHub

Jan 2025 - May 2025

- Sole frontend engineer on a **6-person team**, architecting all UI across **5 subsystems** using React/Next.js with responsive components and state management, while co-designing the domain model and defining functional/non-functional requirements across **6 Agile sprint phases** with CI/CD integration via GitHub
- Integrated **3+ REST APIs** including Yahoo Finance and News API with ticker-based queries for real-time stock data and financial news feeds, reducing data retrieval to sub-second refresh rates, deployed on Vercel

Nomad - Workplace Discovery | Figma, React.js, Firebase, Python, Node.js, GitHub

April 2025

- Authored **20-page technical design document** with user research, prioritization framework, and requirements breakdown, aligning **cross-functional team of 5** (1 designer, 3 engineers) on **4-week delivery roadmap** for remote workspace discovery application
- Implemented technical specifications for Firebase authentication and Google Maps/Places API integration, maintaining **99.5% uptime** on full-stack MVP

Netflix Dataset - Strategy Analysis | Python, pandas, matplotlib, Jupyter Notebook

March 2025

- Engineered **4 data visualizations** using Python, pandas, and matplotlib across an **8,500+ title** Kaggle dataset, implementing data cleaning, extraction, and genre/country segmentation to surface strategic content patterns
- Developed analytical findings on Netflix's accelerated post-2017 acquisition strategy and genre preferences across **20 countries**, extracting actionable business intelligence from complex multi-variable datasets

LEADERSHIP

Vice President | Association for Computing Machinery UTD

December 2025 - Present

- Lead operations for UTD's largest CS organization with **800+ members**, managing **8 divisions** and **150+ officers** through strategic planning, weekly executive meetings, and resource allocation to drive org-wide initiatives

Product Management Mentor | Alpha Kappa Psi - Mu Rho Chapter

August 2025 - Present

- Mentor **4 students** on product management fundamentals, delivering curriculum on PM frameworks, leading case study discussions, and providing guidance on product strategy and leadership to develop core PM competencies

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, C++, C, JavaScript, HTML, TypeScript, Tailwind CSS, C#, SQL

Tools & Frameworks: REST APIs, Linux, Git, Confluence, Coda, Trello, Figma, React, Next.js, GitHub, Visual Studio, Cloudflare, Canva, Eclipse, Google Cloud Platform, Jupyter Notebook, Firebase, MongoDB, OpenAI API, PostgreSQL, Bash

Certifications: Google: Generative AI Fundamentals (2024), Girls Who Code: Synchrony 3 (2022), Microsoft Technology Associate: Software Development Fundamentals (2021) & Introduction to Programming Using Python (2020)
